

Legacy ARN tokens (Ethereum ERC20 or Binance Chain BEP2) => new ARNX token (Ethereum ERC20) swap instructions

Swap your legacy ARN tokens to the new ARNX as follows:

1. Open the token swap page <https://i.aeron.aero/migrate>.
Select your original token type: ARN-71B -> ARNX (Binance Chain) or ARN -> ARNX (Ethereum). You may determine the type of token you hold by looking at its wallet address: bnb1... for Binance Chain (that is likely if you have recently withdrawn your token from Binance) or 0x... for Ethereum.

AERON TOKEN SWAP

Aeron is performing its token upgrade.

Swap your legacy ARN tokens (Ethereum or Binance Chain) to the new ARNX (ERC20) token.

SWAP NOW

4. Aeron Token swap has been initiated for you. To complete the swap you need to transfer your ARN tokens (minimum 100 ARN) to the address you would see in the frame.
5. You must input the “MEMO” field in your ARN (Binance Chain BEP2) transfer, otherwise your tokens cannot be identified. THAT IS IMPORTANT! No “MEMO” = No SWAP. Never withdraw directly to swap address from an exchange, in case exchange interface does not allow “MEMO” field to be edited. In case you’ve done a mistake, send your swap transaction details to info@aeron.aero for manual refund.

Aeron token swap has been initiated!

To Ethereum (ERC20) address:

[Redacted Ethereum address]

To complete the swap you need to transfer ARN tokens to this address:

[Redacted ARN token address] 

You must input the following "MEMO" in your ARN BEP2 transfer:

[Redacted MEMO] 

23:59:16 Awaiting transaction...

Minimum swap amount: **100 ARN**

Token swap completion may take 1-5 minutes.

Warning: In case of ethereum network congestion, your transaction may be delayed.

You can always check your transaction status using the permanent link:

<https://i.aeron.aero/binance/b5467c72-6715-4565-8f3b-02191ad5a830>

If you believe there is been a mistake, please contact us at info@aeron.aero.

6. Wait for the transaction to be confirmed and find ARNX ERC20 tokens in your wallet. Note that extreme congestion of Ethereum network may cause transactions to stay pending for hours. Etherscan link for your token transaction will be available on the swap page.

7. Should you wallet require custom details to view ARNX:

- Contract address:
0x0C37Bcf456bC661C14D596683325623076D7e283
- Token name: Aeron
- Token symbol: ARNX
- Decimals: 18
