Solution

In case of any mismatch in data between any Aeron data source with either the ATC, pilot, or operator, aviation authorities can quickly detect and eliminate the problem. Aviation authorities can also detect any pilots operating with an expired license.

AERON Features

Flight safety is improved with Aeron

You as a pilot can validate your flight experience, facilitating career progression

Your log records cannot be lost or damaged

You can be confident in the experience of your pilot or flight instructor

You data is automatically matched from multiple log data sources, eliminating fake entries

You can pay for flights, AM and FBO services with fiat and cryptocurrencies using mobile app

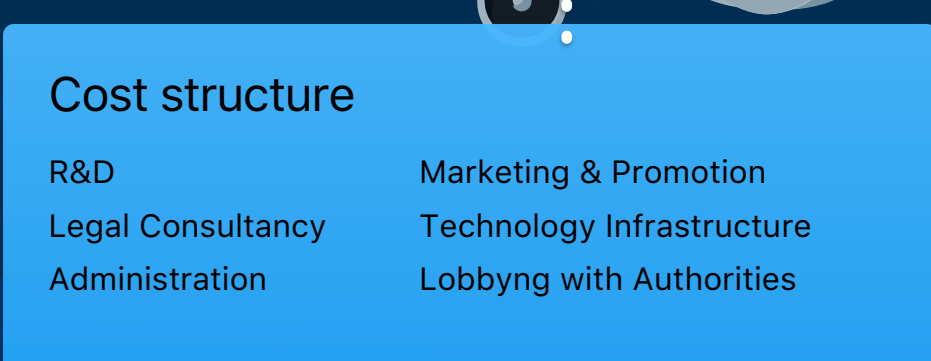

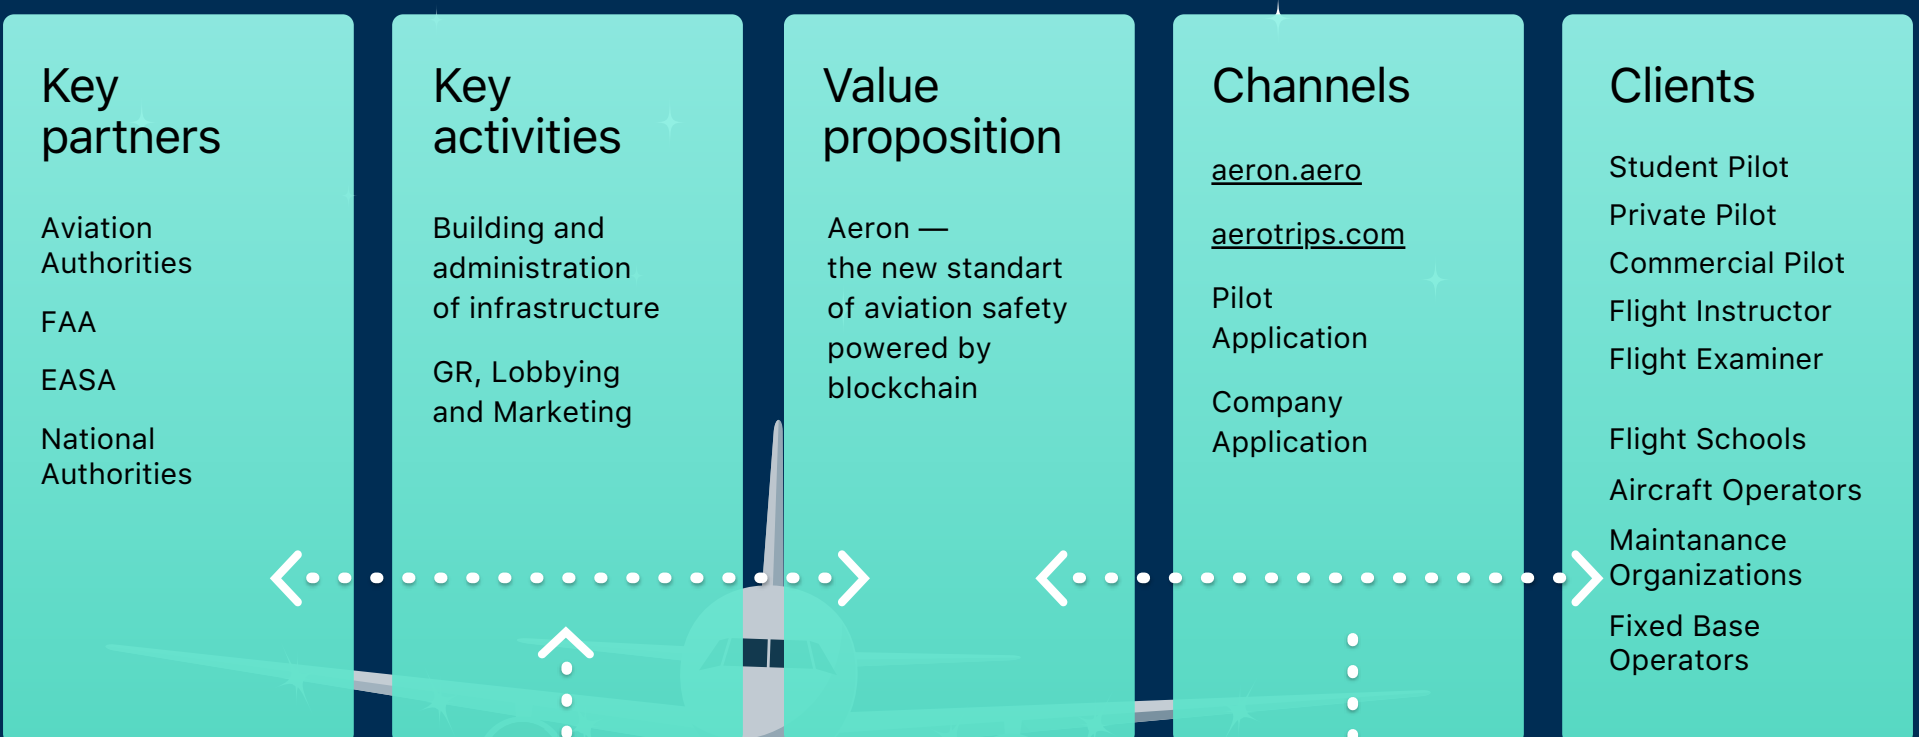

You get discounts for flights, AM and FBO services with the loyalty/membership program

Your aircraft has a transparent maintenance history in blockchain, increasing resale value

You can easily find options for aircraft charters, leisure flights, and pilot training

AM — Aircraft Maintenance, FBO — Fixed Base Operators

Business model

Why we do Token Sale?

Your benefit

You can contribute to the new aviation safety solution, saving people's lives all around the world. Use Aeron token to pay for flights and Aeron services.
